A correct photon count does not guarantee correct photon placement
Frozen native 32³ field at z = 7.5
Opaque plane with finite travel distance
ES control
ES global
ES front
Voronoi
Radial shell
Adaptive event
Reference angular change: 0.055%
Absorption L1 / emitted photons (%)
Transport / allocation time (s; one worker)
Isotropic geometric result: 35.417%
Emitted photons absorbed by the plane (%)
ES global
ES front
Radial shell
Voronoi
Adaptive event
